- ◆ CPU performs self-diagnostics every time vehicle is started
- ◆ Solid state microprocessor controller
- ◆ Intermittent Fault Filter (IFF)® technology filters out all erroneous changes in sensor signals
- ◆ Ford & Chevy applications
- ◆ Compact unit is easy to install

LOCK MODULE

OVERVIEW

InterMotive's Lock prohibits lift operation anytime the vehicle is unsecured. The Lock was designed & tested using a collaborative effort that included manufacturers, installers, & end-users. This led to a completely automatic lift interlock system that complies with the lift interlock requirements of the Americans Disabilities Act (ADA) Title 49 Code of Regulations & FMVSS 403/404.

Ease of installation & operation, & high system reliability make InterMotive's Lock the "low cost" lift interlock of choice!
