

PARK CRANK ONLY MODULE

Prevents Possible Accidents From Neutral Start-Ups

FEATURES & BENEFITS

- ◆ Engine can be started only when the transmission is in Park
- ◆ Detects transmission gear without any additional switches or sensors
- ◆ Provides added protection against moving vehicle with lift extended
- ◆ Durable module utilizes solid state electronics to provide superior product life
- ◆ Compact unit is easy to install
- ◆ Inexpensive safety enhancement

For Paratransit Vehicles

OVERVIEW

- ◆ Allows engine to start only when the automatic transmission is in Park
- ◆ Detects transmission gear electronically (the same way as the vehicle computer) making PCOM simple to install
- ◆ Works in conjunction with InterMotive's Intelligent Lift Interlock System & prevents the possibility of starting up in neutral

Safe, Simple & Reliable

*A system with no moving & fewer parts
makes for a more reliable system!*

Easy Installation

*As Few as 5 Wires to Hook Up
Quick, Clean, & Simple!*
