

SPEED SENTINEL[®] II

Programmable Road Speed Limiter

FEATURES & BENEFITS

- ◆ Maximum programmable vehicle speed can be set from 10-80 MPH
- ◆ Flexible– the speed setting is reprogrammable; capable of two independent speed settings
- ◆ Does not limit engine output below maximum speed setting
- ◆ Passing mode (10 second override) can be enabled or disabled
- ◆ “Plug & Play” installation– no cutting of factory wires, (varies by OEM chassis)
- ◆ Dynamic Load Response, Speed Sentinel adjusts for varying road terrains
- ◆ Engine Idle Function– Forces engine to stay in idle mode for possible theft prevention by deactivating the throttle pedal
- ◆ Electronic Override for Emergency Vehicles when in Code 3 mode
- ◆ Holds speed like cruise control– does not apply the brakes

WHY SPEED SENTINEL II[®]?

- ◆ **Lower Fuel Costs**– Cutting your speed from 65 to 60 MPH is equivalent to paying \$0.40 less per gallon. Every 5 MPH over 60 reduces fuel economy by 7%– the more you cut, the more you save!
- ◆ **Reduce Accidents**– Speed is the number one cause of accidents as cited in a AAA funded study written by Virginia Tech Transportation Institute. “speed is likely to be the single most important deterrent in the frequency of traffic fatalities”¹ Speeding nearly triples the odds of an accident
- ◆ **Prevention**– Speed Sentinel prevents the driver from speeding. GPS systems only “tells on the driver” after they have already driven above the speed limit
- ◆ **Reduce Insurance Costs**– Talk to your insurance agent about possible discounts when you use a speed limiter
- ◆ **Meets NFPA 1917 Requirements**
